# INTRODUCTION

## ROCKBUSTER STEALTH

Rockbuster Stealth LLC is a movie rental company with multiple stores worldwide. The management team is planning to use the existing movie licenses to launch an online video rental service to stay competitive. At the same time, it is facing competition from streaming services.

## DATA

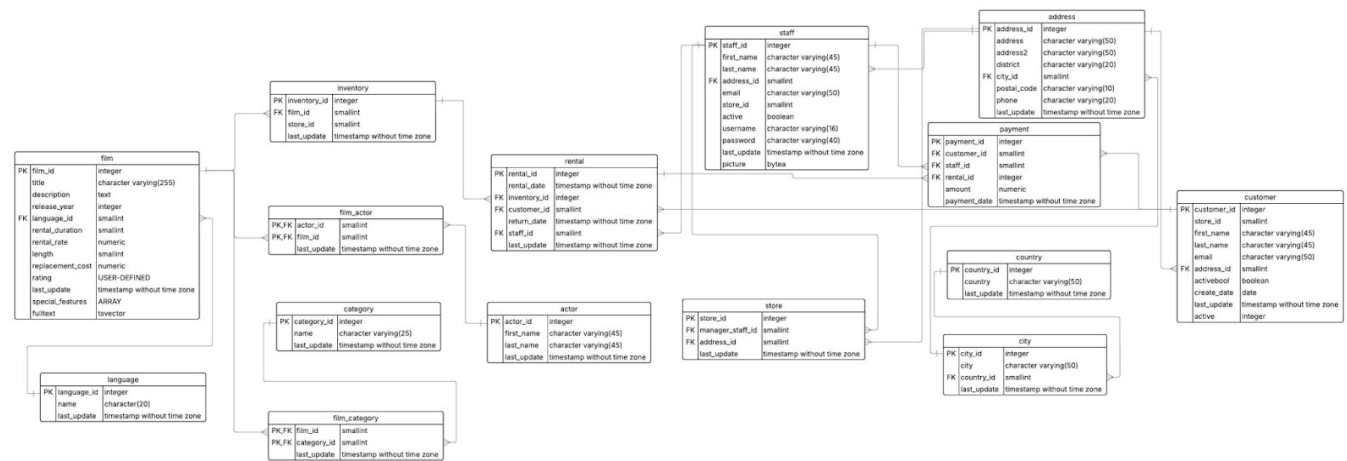

The database supports the launch strategy for the new online video service. The business intelligence (BI) department helps other departments, from inventory to customer insights, with data-related queries.

This dictionary facilitates the interpretation of the relational database management system (RDBMS).
